About Doing Business

The Doing Business project provides objective measures of business regulations and their enforcement across 190 economies and selected cities at the subnational and regional level.

The Doing Business project, launched in 2002, looks at domestic small and medium-size companies and measures the regulations applying to them through their life cycle.

Doing Business captures several important dimensions of the regulatory environment as it applies to local firms. It provides quantitative indicators on registration for starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. Doing Business also measures features of labor market regulation. Although Doing Business does not present rankings of economies on the labor market regulation indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business, it does present the data for these indicators.

By gathering and analyzing comprehensive quantitative data to compare business regulation environments across economies and over time, Doing Business encourages economies to compete towards more efficient regulation; offers measurable benchmarks for reform; and serves as a resource for academics, journalists, private sector researchers and others interested in the business climate of each economy.

In addition, Doing Business offers detailed subnational reports, which exhaustively cover business regulation and reform in different cities and regions within a nation. These reports provide data on the ease of doing business, rank each location, and recommend reforms to improve performance in each of the indicator areas. Selected cities can compare their business regulations with other cities in the economy or region and with the 190 economies that Doing Business has ranked.

The first Doing Business report, published in 2003, covered 5 indicator sets and 133 economies. This year’s report covers 11 indicator sets and 190 economies. Most indicator sets refer to a case scenario in the largest business city of each economy, except for 11 economies that have a population of more than 100 million as of 2013 (Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States) where Doing Business also collected data for the second largest business city. The data for these 11 economies are a population-weighted average for the 2 largest business cities. The project has benefited from feedback from governments, academics, practitioners and reviewers. The initial goal remains: to provide an objective basis for understanding and improving the regulatory environment for business around the world.

More about Doing Business (PDF, 5MB)
Ease of Doing Business in Nepal

Region: South Asia
Income Category: Low Income
Population: 29,304,998
City Covered: Kathmandu

DB 2019 Rank: 190
DB 2019 Ease of doing business score: 59.63

DB 2019 Ease of Doing Business Score

Note: The ease of doing business score captures the gap of each economy from the best regulatory performance observed on each of the indicators across all economies in the Doing Business sample since 2005. An economy’s ease of doing business score is reflected on a scale from 0 to 100, where 0 represents the lowest and 100 represents the best performance. The ease of doing business ranking ranges from 1 to 190.

Rankings on Doing Business topics - Nepal

Ease of Doing Business Score on Doing Business topics - Nepal
Starting a Business

This topic measures the number of procedures, time, cost and paid-in minimum capital requirement for a small- to medium-sized limited liability company to start up and formally operate in each economy’s largest business city.

To make the data comparable across 190 economies, *Doing Business* uses a standardized business that is 100% domestically owned, has start-up capital equivalent to 10 times the income per capita, engages in general industrial or commercial activities and employs between 10 and 50 people one month after the commencement of operations, all of whom are domestic nationals. Starting a Business considers two types of local limited liability companies that are identical in all aspects, except that one company is owned by 5 married women and the other by 5 married men. The ranking of economies on the ease of starting a business is determined by sorting their scores for starting a business. These scores are the simple average of the scores for each of the component indicators.

The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedures to legally start and formally operate a company (number)</td>
<td>To make the data comparable across economies, several assumptions about the business and the procedures are used. It is assumed that any required information is readily available and that the entrepreneur will pay no bribes.</td>
</tr>
<tr>
<td>- Preregistration (for example, name verification or reservation, notarization)</td>
<td>The business:</td>
</tr>
<tr>
<td>- Registration in the economy’s largest business city</td>
<td>- Is a limited liability company (or its legal equivalent). If there is more than one type of limited liability company in the economy, the most common among domestic firms is chosen. Information on the most common form is obtained from incorporation lawyers or the statistical office.</td>
</tr>
<tr>
<td>- Postregistration (for example, social security registration, company seal)</td>
<td>- Operates in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>- Obtaining approval from spouse to start a business or to leave the home to register the company</td>
<td>- The entire office space is approximately 929 square meters (10,000 square feet).</td>
</tr>
<tr>
<td>- Obtaining any gender specific document for company registration and operation or national identification card</td>
<td>- Is 100% domestically owned and has five owners, none of whom is a legal entity; has a start-up capital of 10 times income per capita and has a turnover of at least 100 times income per capita.</td>
</tr>
<tr>
<td>Time required to complete each procedure (calendar days)</td>
<td>- Performs general industrial or commercial activities, such as the production or sale of goods or services to the public. The business does not perform foreign trade activities and does not handle products subject to a special tax regime, for example, liquor or tobacco. It does not use heavily polluting production processes.</td>
</tr>
<tr>
<td>- Does not include time spent gathering information</td>
<td>- Leases the commercial plant or offices and is not a proprietor of real estate and the amount of the annual lease for the office space is equivalent to the income per capita.</td>
</tr>
<tr>
<td>- Each procedure starts on a separate day (2 procedures cannot start on the same day)</td>
<td>- Does not qualify for investment incentives or any special benefits.</td>
</tr>
<tr>
<td>- Procedures fully completed online are recorded as ½ day</td>
<td>- Has at least 10 and up to 50 employees one month after the commencement of operations, all of whom are domestic nationals.</td>
</tr>
<tr>
<td>- Procedure is considered completed once final document is received</td>
<td>- Has a company deed that is 10 pages long.</td>
</tr>
<tr>
<td>- No prior contact with officials</td>
<td>The owners:</td>
</tr>
<tr>
<td>Cost required to complete each procedure (% of income per capita)</td>
<td>- Have reached the legal age of majority. If there is no legal age of majority, they are assumed to be 30 years old.</td>
</tr>
<tr>
<td>- Official costs only, no bribes</td>
<td>- Are sane, competent, in good health and have no criminal record.</td>
</tr>
<tr>
<td>- No professional fees unless services required by law or commonly used in practice</td>
<td>- Are married and the marriage is monogamous and registered with the authorities.</td>
</tr>
<tr>
<td>Paid-in minimum capital (% of income per capita)</td>
<td>- Where the answer differs according to the legal system applicable to the woman or man in question (as may be the case in economies where there is legal plurality), the answer used will be the one that applies to the majority of the population.</td>
</tr>
<tr>
<td>- Funds deposited in a bank or with third party before registration or up to 3 months after incorporation</td>
<td></td>
</tr>

</table>
|   | **Register for VAT and Income Tax at the Inland Revenue Office, Ministry of Finance**  
Agency: Inland Revenue Office  
According to the Value Added Tax Act 2052, of 1996, the company must disclose the office address and withhold 10% tax of the rent for at least 3 months and deposit it to the tax office. If the company’s objectives include goods or services subject to VAT, both registrations (VAT and income tax) should be obtained simultaneously. | 1 day | no charge |
|---|---|---|---|
| 7 | **Enroll the employees in the Provident Fund**  
Agency: Employees Provident Fund  
Companies that employ more than 10 employees are required to deduct every month 10% from the basic salary of each employee, matched by a contribution from the employer. The contribution is made to the Employees Provident Fund (EPF) or the internal fund within the company, and it is released upon employee retirement. The employer further needs to pay gratuity at the rate prescribed by the labor regulations upon the employee’s retirement. In case contributions are deposited with the EPF, then registration of employees is done at the time of submission of such contributions. If company decides to use internal special fund, then no additional registration of employees is required. The majority of companies prefer to make contributions to EPF. | 1 day | no charge |

=Takes place simultaneously with previous procedure.
Dealing with Construction Permits

This topic tracks the procedures, time and cost to build a warehouse—including obtaining necessary the licenses and permits, submitting all required notifications, requesting and receiving all necessary inspections and obtaining utility connections. In addition, the Dealing with Construction Permits indicator measures the building quality control index, evaluating the quality of building regulations, the strength of quality control and safety mechanisms, liability and insurance regimes, and professional certification requirements. The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Procedures to legally build a warehouse (number)</strong></td>
<td>To make the data comparable across economies, several assumptions about the construction company, the warehouse project and the utility connections are used.</td>
</tr>
<tr>
<td>• Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates</td>
<td><strong>The construction company (BuildCo):</strong></td>
</tr>
<tr>
<td>• Submitting all required notifications and receiving all necessary inspections</td>
<td>- Is a limited liability company (or its legal equivalent) and operates in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Obtaining utility connections for water and sewerage</td>
<td>- Is 100% domestically and privately owned; has five owners, none of whom is a legal entity. Has a licensed architect and a licensed engineer, both registered with the local association of architects or engineers. BuildCo is not assumed to have any other employees who are technical or licensed experts, such as geological or topographical experts.</td>
</tr>
<tr>
<td>• Registering and selling the warehouse after its completion</td>
<td>- Owns the land on which the warehouse will be built and will sell the warehouse upon its completion.</td>
</tr>
<tr>
<td><strong>Time required to complete each procedure (calendar days)</strong></td>
<td><strong>The warehouse:</strong></td>
</tr>
<tr>
<td>• Does not include time spent gathering information</td>
<td>- Will be used for general storage activities, such as storage of books or stationery.</td>
</tr>
<tr>
<td>• Each procedure starts on a separate day—though procedures that can be fully completed online are an exception to this rule</td>
<td>- Will have two stories, both above ground, with a total constructed area of approximately 1,300.6 square meters (14,000 square feet). Each floor will be 3 meters (9 feet, 10 inches) high and will be located on a land plot of approximately 929 square meters (10,000 square feet) that is 100% owned by BuildCo, and the warehouse is valued at 50 times income per capita.</td>
</tr>
<tr>
<td>• Procedure is considered completed once final document is received</td>
<td>- Will have complete architectural and technical plans prepared by a licensed architect. If preparation of the plans requires such steps as obtaining further documentation or getting prior approvals from external agencies, these are counted as procedures.</td>
</tr>
<tr>
<td>• No prior contact with officials</td>
<td>- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).</td>
</tr>
<tr>
<td><strong>Cost required to complete each procedure (% of income per capita)</strong></td>
<td><strong>The water and sewerage connections:</strong></td>
</tr>
<tr>
<td>• Official costs only, no bribes</td>
<td>- Will be 150 meters (492 feet) from the existing water source and sewer tap. If there is no water delivery infrastructure in the economy, a borehole will be dug. If there is no sewerage infrastructure, a septic tank in the smallest size available will be installed or built.</td>
</tr>
<tr>
<td><strong>Building quality control index (0-15)</strong></td>
<td>- Will have an average water use of 662 liters (175 gallons) a day and an average wastewater flow of 568 liters (150 gallons) a day. Will have a peak water use of 1,325 liters (350 gallons) a day and a peak wastewater flow of 1,136 liters (300 gallons) a day.</td>
</tr>
<tr>
<td>• Quality of building regulations (0-2)</td>
<td>- Will have a constant level of water demand and wastewater flow throughout the year; will be 1 inch in diameter for the water connection and 4 inches in diameter for the sewerage connection.</td>
</tr>
<tr>
<td>• Quality control before construction (0-1)</td>
<td></td>
</tr>

Getting Electricity

This topic measures the procedures, time and cost required for a business to obtain a permanent electricity connection for a newly constructed warehouse. Additionally, the reliability of supply and transparency of tariffs index measures reliability of supply, transparency of tariffs and the price of electricity. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedures to obtain an electricity connection (number)</td>
<td>To make the data comparable across economies, several assumptions about the warehouse, the electricity connection and the monthly consumption are used.</td>
</tr>
<tr>
<td>• Submitting all relevant documents and obtaining all necessary clearances and permits</td>
<td>The warehouse:</td>
</tr>
<tr>
<td>• Completing all required notifications and receiving all necessary inspections</td>
<td>- Is owned by a local entrepreneur and is used for storage of goods.</td>
</tr>
<tr>
<td>• Obtaining external installation works and possibly purchasing material for these works</td>
<td>- Is located in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Concluding any necessary supply contract and obtaining final supply</td>
<td>- Is located in an area where similar warehouses are typically located and is in an area with no physical constraints. For example, the property is not near a railway.</td>
</tr>
<tr>
<td>Time required to complete each procedure (calendar days)</td>
<td>- Is a new construction and is being connected to electricity for the first time.</td>
</tr>
<tr>
<td>• Is at least 1 calendar day</td>
<td>- Has two stories with a total surface area of approximately 1,300.6 square meters (14,000 square feet). The plot of land on which it is built is 929 square meters (10,000 square feet).</td>
</tr>
<tr>
<td>• Each procedure starts on a separate day</td>
<td>The electricity connection:</td>
</tr>
<tr>
<td>• Does not include time spent gathering information</td>
<td>- Is a permanent one with a three-phase, four-wire Y connection with a subscribed capacity of 140-kilo-volt-ampere (kVA) with a power factor of 1, when 1 kVA = 1 kilowatt (kW).</td>
</tr>
<tr>
<td>• Reflects the time spent in practice, with little follow-up and no prior contact with officials</td>
<td>- Has a length of 150 meters. The connection is to either the low- or medium-voltage distribution network and is either overhead or underground, whichever is more common in the area where the warehouse is located and requires works that involve the crossing of a 10-meter road (such as by excavation or overhead lines) but are all carried out on public land. There is no crossing of other owners’ private property because the warehouse has access to a road.</td>
</tr>
<tr>
<td>Cost required to complete each procedure (% of income per capita)</td>
<td>- Does not require work to install the internal wiring of the warehouse. This has already been completed up to and including the customer’s service panel or switchboard and the meter base.</td>
</tr>
<tr>
<td>• Official costs only, no bribes</td>
<td>The monthly consumption:</td>
</tr>
<tr>
<td>• Value added tax excluded</td>
<td>- It is assumed that the warehouse operates 30 days a month from 9:00 a.m. to 5:00 p.m. (8 hours a day), with equipment utilized at 80% of capacity on average and that there are no electricity cuts (assumed for simplicity reasons) and the monthly energy consumption is 26,880 kilowatt-hours (kWh); hourly consumption is 112 kWh.</td>
</tr>
<tr>
<td>The reliability of supply and transparency of tariffs index (0-8)</td>
<td>- If multiple electricity suppliers exist, the warehouse is served by the cheapest supplier.</td>
</tr>
<tr>
<td>• Duration and frequency of power outages (0–3)</td>
<td>- Tariffs effective in January of the current year are used for calculation of the price of electricity for the warehouse. Although January has 31 days, for calculation purposes only 30 days are used.</td>
</tr>
<tr>
<td>• Tools to monitor power outages (0-1)</td>
<td></td>
</tr>
<tr>
<td>• Tools to restore power supply (0-1)</td>
<td></td>
</tr>
<tr>
<td>• Regulatory monitoring of utilities’ performance (0-1)</td>
<td></td>
</tr>
<tr>
<td>• Financial deterrents limiting outages (0-1)</td>
<td></td>
</tr>
<tr>
<td>• Transparency and accessibility of tariffs (0-1)</td>
<td></td>
</tr>
<tr>
<td>Price of electricity (cents per kilowatt-hour)*</td>
<td></td>
</tr>
<tr>
<td>• Price based on monthly bill for commercial warehouse in case study</td>
<td></td>
</tr>
</tbody>
</table>

*Note: Doing Business measures the price of electricity, but it is not included in the ease of doing business score nor the ranking on the ease of getting electricity.

<td>0</td>
</tr>
<tr>
<td>System average interruption duration index (SAIDI)</td>
<td>..</td>
</tr>
<tr>
<td>System average interruption frequency index (SAIFI)</td>
<td>..</td>
</tr>
<tr>
<td>What is the minimum outage time (in minutes) that the utility considers for the calculation of SAIDI/SAIFI</td>
<td>N/A</td>
</tr>
<tr>
<td>Mechanisms for monitoring outages (0-1)</td>
<td>0</td>
</tr>
<tr>
<td>Does the distribution utility use automated tools to monitor outages?</td>
<td>No</td>
</tr>
<tr>
<td>Mechanisms for restoring service (0-1)</td>
<td>0</td>
</tr>
<tr>
<td>Does the distribution utility use automated tools to restore service?</td>
<td>No</td>
</tr>
<tr>
<td>Regulatory monitoring (0-1)</td>
<td>0</td>
</tr>
<tr>
<td>Does a regulator—that is, an entity separate from the utility—monitor the utility’s performance on reliability of supply?</td>
<td>No</td>
</tr>
<tr>
<td>Financial deterrents aimed at limiting outages (0-1)</td>
<td>0</td>
</tr>
<tr>
<td>Does the utility either pay compensation to customers or face fines by the regulator (or both) if outages exceed a certain cap?</td>
<td>No</td>
</tr>
<tr>
<td>Communication of tariffs and tariff changes (0-1)</td>
<td>1</td>
</tr>
<tr>
<td>Are effective tariffs available online?</td>
<td>Yes</td>
</tr>
<tr>
<td>Are customers notified of a change in tariff ahead of the billing cycle?</td>
<td>Yes</td>
</tr>
</tbody>
</table>

**Note:**

- If the duration and frequency of outages is 100 or less, the economy is eligible to score on the Reliability of supply and transparency of tariff index.
- If the duration and frequency of outages is not available, or is over 100, the economy is not eligible to score on the index.
- If the minimum outage time considered for SAIDI/SAIFI is over 5 minutes, the economy is not eligible to score on the index.
Registering Property

This topic examines the steps, time and cost involved in registering property, assuming a standardized case of an entrepreneur who wants to purchase land and a building that is already registered and free of title dispute. In addition, the topic also measures the quality of the land administration system in each economy. The quality of land administration index has five dimensions: reliability of infrastructure, transparency of information, geographic coverage, land dispute resolution, and equal access to property rights. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>

</tr>
<tr>
<td>• Preregistration procedures (for example, checking for liens, notarizing sales agreement, paying property transfer taxes)</td>
<td>- Are limited liability companies (or the legal equivalent).</td>
</tr>
<tr>
<td>• Registration procedures in the economy’s largest business city.</td>
<td>- Are located in the periurban area of the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Postregistration procedures (for example, filling title with municipality)</td>
<td>- Are 100% domestically and privately owned.</td>
</tr>
<tr>
<td><strong>Time required to complete each procedure (calendar days)</strong></td>
<td>- Have 50 employees each, all of whom are nationals.</td>
</tr>
<tr>
<td>• Does not include time spent gathering information</td>
<td>- Perform general commercial activities.</td>
</tr>
<tr>
<td>• Each procedure starts on a separate day - though procedures that can be fully completed online are an exception to this rule</td>
<td><strong>The property (fully owned by the seller):</strong></td>
</tr>
<tr>
<td>• Procedure is considered completed once final document is received</td>
<td>- Has a value of 50 times income per capita, which equals the sale price.</td>
</tr>
<tr>
<td>• No prior contact with officials</td>
<td>- Is fully owned by the seller.</td>
</tr>
<tr>
<td><strong>Cost required to complete each procedure (% of property value)</strong></td>
<td>- Has no mortgages attached and has been under the same ownership for the past 10 years.</td>
</tr>
<tr>
<td>• Official costs only (such as administrative fees, duties and taxes).</td>
<td>- Is registered in the land registry or cadastre, or both, and is free of title disputes.</td>
</tr>
<tr>
<td>• Value Added Tax, Capital Gains Tax and illicit payments are excluded</td>
<td>- Is located in a periurban commercial zone, and no rezoning is required.</td>
</tr>
<tr>
<td><strong>Quality of land administration index (0-30)</strong></td>
<td>- Consists of land and a building. The land area is 557.4 square meters (6,000 square feet). A two-story warehouse of 929 square meters (10,000 square feet) is located on the land. The warehouse is 10 years old, is in good condition, has no heating system and complies with all safety standards, building codes and legal requirements. The property, consisting of land and building, will be transferred in its entirety.</td>
</tr>
<tr>
<td>• Reliability of infrastructure index (0-8)</td>
<td>- Will not be subject to renovations or additional construction following the purchase.</td>
</tr>
<tr>

### Details - Registering Property in Nepal - Procedure, Time and Cost

<table>
<thead>
<tr>
<th>No.</th>
<th>Procedures</th>
<th>Time to Complete</th>
<th>Associated Costs</th>
</tr>
</thead>
</table>
| 1   | **Obtain ownership certificate**  
*Agency*: Land Revenue Office  
The purchaser should conduct the property search at the Registry and the Revenue Office in order to obtain the ownership certificate. The purchaser must provide the location details of the property and the period of time that needs to be check. | 1 day            | no charge                                        |
| 2   | **Obtain tax clearance certificate and certificate of access and building from the Municipality (relevant ward committee)**  
*Agency*: Municipality  
The seller must go to the local government to certify the type of road that adjoins the property. 25 wards divide the municipality of Kathmandu. The seller has to go to the ward committee to obtain the certificate, which can be done in one day and it costs Rs 3000. A tax clearance certificate must be obtained from the Municipality regarding the payment of the property tax. If the property is not yet registered in the Municipality for tax purposes, it might take a few days to collect the necessary papers of building permit, land deed, land revenue papers, field visit of municipal engineers to verify and assess the property, etc. In any case, it should not take more than seven days. The value of the property for tax purposes is evaluated by a committee of the Land Revenue Office (comprised of land registry office employees) who take into consideration a variety of metrics, including the current market value, distance to a road, and size of the parcel and building. | 2 days            | NPR 3,000                                        |
| 3   | **Hire lekhandas or paralegals**  
*Agency*: Lawyers Office  
Legally, the parties can prepare the transfer deed documents by themselves, but it usually is done by the lekhandas, or paralegals. The deed documents are a certificate of citizenship, certificate of ownership, and a tax clearance certificate. The lekhandas can also help the seller verify the land ownership certificate with the original land ownership book before preparing the deed. | 1 day            | NPR 7,000                                        |
| 4   | **Registration of the deed and issuance of a new title certificate**  
*Agency*: Land Revenue Office  
The transfer deed is submitted for registration to the Land Revenue Office. The Land Revenue Office checks the authenticity of the seller against the Citizenship Certificate. The existence of liens or encumbrances on the property is also reviewed on the same day by the Land Revenue Office. The registration fee (4.5% of property price in case of municipal areas, according to Finance Act of 2065 Nepalese calendar, implemented in June 2008) is paid at the Land Revenue Office at the moment of applying for registration. Parties must sign and thumb print on the transfer deed. After the officer verifies all documents, the transfer deed will be registered, and the title certificate will usually be issued on the same day. The documentation shall include: Land Ownership Certificate (already in possession of the seller), Citizenship Certificate of seller and buyer or Incorporation Certificate of Company Tax clearance from the Municipality/Village Development Committee (obtained in Procedure 2) | 2 days            | NPR 200,632.3;  
(4.5% of property  
price for the registration fee) |

*Note*: Takes place simultaneously with previous procedure.

Getting Credit

This topic explores two sets of issues—the strength of credit reporting systems and the effectiveness of collateral and bankruptcy laws in facilitating lending. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Strength of legal rights index (0-12)</strong></td>
<td>Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. For each economy it is first determined whether a unitary secured transactions system exists. Then two case scenarios, case A and case B, are used to determine how a nonpossessory security interest is created, publicized and enforced according to the law. Special emphasis is given to how the collateral registry operates (if registration of security interests is possible). The case scenarios involve a secured borrower, company ABC, and a secured lender, BizBank.</td>
</tr>
<tr>
<td>• Rights of borrowers and lenders through collateral laws (0-10)</td>
<td></td>
</tr>
<tr>
<td>• Protection of secured creditors' rights through bankruptcy laws (0-2)</td>
<td></td>
</tr>
<tr>
<td><strong>Depth of credit information index (0-8)</strong></td>
<td>In some economies the legal framework for secured transactions will allow only case A or case B (not both) to apply. Both cases examine the same set of legal provisions relating to the use of movable collateral.</td>
</tr>
<tr>
<td>• Scope and accessibility of credit information distributed by credit bureaus and credit registries (0-8)</td>
<td>Several assumptions about the secured borrower (ABC) and lender (BizBank) are used:</td>
</tr>
<tr>
<td><strong>Credit bureau coverage (% of adults)</strong></td>
<td>- ABC is a domestic limited liability company (or its legal equivalent).</td>
</tr>
<tr>
<td>• Number of individuals and firms listed in largest credit bureau as a percentage of adult population</td>
<td>- ABC has up to 50 employees.</td>
</tr>
<tr>
<td><strong>Credit registry coverage (% of adults)</strong></td>
<td>- ABC has its headquarters and only base of operations in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Number of individuals and firms listed in credit registry as a percentage of adult population</td>
<td>- Both ABC and BizBank are 100% domestically owned.</td>
</tr>
</tbody>
</table>

The case scenarios also involve assumptions. In case A, as collateral for the loan, ABC grants BizBank a nonpossessory security interest in one category of movable assets, for example, its machinery or its inventory. ABC wants to keep both possession and ownership of the collateral. In economies where the law does not allow nonpossessory security interests in movable property, ABC and BizBank use a fiduciary transfer-of-title arrangement (or a similar substitute for nonpossessory security interests).

In case B, ABC grants BizBank a business charge, enterprise charge, floating charge or any charge that gives BizBank a security interest over ABC’s combined movable assets (or as much of ABC’s movable assets as possible). ABC keeps ownership and possession of the assets.

Details - Legal Rights in Nepal

Strength of legal rights index (0-12) 10

- Does an integrated or unified legal framework for secured transactions that extends to the creation, publicity and enforcement of functional equivalents to security interests in movable assets exist in the economy? Yes
- Does the law allow businesses to grant a non possessory security right in a single category of movable assets, without requiring a specific description of collateral? Yes
- Does the law allow businesses to grant a non possessory security right in substantially all of its assets, without requiring a specific description of collateral? Yes
- May a security right extend to future or after-acquired assets, and does it extend automatically to the products, proceeds and replacements of the original assets? Yes
- Is a general description of debts and obligations permitted in collateral agreements; can all types of debts and obligations be secured between parties; and can the collateral agreement include a maximum amount for which the assets are encumbered? Yes
- Is a collateral registry in operation for both incorporated and non-incorporated entities, that is unified geographically and by asset type, with an electronic database indexed by debtor's name? Yes
- Does a notice-based collateral registry exist in which all functional equivalents can be registered? Yes
- Does a modern collateral registry exist in which registrations, amendments, cancellations and searches can be performed online by any interested third party? Yes
- Are secured creditors paid first (i.e. before tax claims and employee claims) when a debtor defaults outside an insolvency procedure? No
- Are secured creditors paid first (i.e. before tax claims and employee claims) when a business is liquidated? Yes
- Are secured creditors subject to an automatic stay on enforcement when a debtor enters a court-supervised reorganization procedure? Does the law protect secured creditors’ rights by providing clear grounds for relief from the stay and sets a time limit for it? No
- Does the law allow parties to agree on out of court enforcement at the time a security interest is created? Does the law allow the secured creditor to sell the collateral through public auction or private tender, as well as, for the secured creditor to keep the asset in satisfaction of the debt? Yes

</tr>
</tbody>
</table>

Note: An economy receives a score of 1 if there is a “yes” to either bureau or registry. If the credit bureau or registry is not operational or covers less than 5% of the adult population, the total score on the depth of credit information index is 0.
Protecting Minority Investors

This topic measures the strength of minority shareholder protections against misuse of corporate assets by directors for their personal gain as well as shareholder rights, governance safeguards and corporate transparency requirements that reduce the risk of abuse. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

### What the indicators measure

- **Extent of disclosure index (0-10):** Review and approval requirements for related-party transactions; Disclosure requirements for related-party transactions
- **Extent of director liability index (0-10):** Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)
- **Ease of shareholder suits index (0-10):** Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)
- **Extent of conflict of interest regulation index (0-10):** Shareholders’ rights and role in major corporate decisions
- **Extent of shareholder rights index (0-10):** Shareholders’ rights and role in major corporate decisions
- **Extent of ownership and control index (0-10):** Governance safeguards protecting shareholders from undue board control and entrenchment
- **Extent of corporate transparency index (0-10):** Corporate transparency on ownership stakes, compensation, audits and financial prospects
- **Extent of shareholder governance index (0-10):** Simple average of the extent of shareholder rights, extent of ownership and control and extent of corporate transparency indices
- **Strength of minority investor protection index (0-10):** Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices

### Case study assumptions

To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

#### The business (Buyer):

- Is a publicly traded corporation listed on the economy’s most important stock exchange. If there are fewer than ten listed companies or if there is no stock exchange in the economy, it is assumed that Buyer is a large private company with multiple shareholders.
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.
- Has a supervisory board in economies with a two-tier board system on which Mr. James appointed 60% of the shareholder-elected members.
- Has not adopted bylaws or articles of association that go beyond the minimum requirements. Does not follow codes, principles, recommendations or guidelines that are not mandatory.
- Is a manufacturing company with its own distribution network.

#### The transaction involves the following details:

- Mr. James owns 60% of Buyer, sits on Buyer’s board of directors and elected two directors to Buyer’s five-member board.
- Mr. James also owns 90% of Seller, a company that operates a chain of retail hardware stores. Seller recently closed a large number of its stores.
- Mr. James proposes that Buyer purchase Seller’s unused fleet of trucks to expand Buyer’s distribution of its food products, a proposal to which Buyer agrees. The price is equal to 10% of Buyer’s assets and is higher than the market value.
- The proposed transaction is part of the company’s principal activity and is not outside the authority of the company.
- Buyer enters into the transaction. All required approvals are obtained, and all required disclosures made— that is, the transaction was not entered into fraudulently.
- Mr. James proposes that Buyer purchase Seller’s unused fleet of trucks to expand Buyer’s distribution of its food products, a proposal to which Buyer agrees. The price is equal to 10% of Buyer’s assets and is higher than the market value.
- Buyer enters into the transaction. All required approvals are obtained, and all required disclosures made—that is, the transaction was not entered into fraudulently.
- The transaction causes damages to Buyer. Shareholders sue Mr. James and the executives and directors that approved the transaction.

Paying Taxes

This topic records the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year, as well as the administrative burden of paying taxes and contributions and complying with postfiling procedures (VAT refund and tax audit). The most recent round of data collection for the project was completed in May 2018 covering for the Paying Taxes indicator calendar year 2017 (January 1, 2017 - December 31, 2017). See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tax payments for a manufacturing company in 2017 (number per year adjusted for electronic and joint filing and payment)</td>
<td>Using a case scenario, Doing Business records taxes and mandatory contributions a medium size company must pay in a year, and measures the administrative burden of paying taxes, contributions and dealing with postfiling processes. Information is also compiled on frequency of filing and payments, time taken to comply with tax laws, time taken to comply with the requirements of postfiling processes and time waiting.</td>
</tr>
<tr>
<td>• Total number of taxes and contributions paid or withheld, including consumption taxes (value added tax, sales tax or goods and service tax)</td>
<td>To make data comparable across economies, several assumptions are used: - TaxpayerCo is a medium-size business that started operations on January 1, 2016. It produces ceramic flowerpots and sells them at retail. All taxes and contributions recorded are paid in the second year of operation (calendar year 2017). Taxes and mandatory contributions are measured at all levels of government.</td>
</tr>
<tr>
<td>• Method and frequency of filing and payment</td>
<td>The VAT refund process: - In June 2017, TaxpayerCo. makes a large capital purchase: the value of the machine is 65 times income per capita of the economy. Sales are equally spread per month (1,050 times income per capita divided by 12) and cost of goods sold are equally expensed per month (875 times income per capita divided by 12). The machinery seller is registered for VAT and excess input VAT incurred in June will be fully recovered after four consecutive months if the VAT rate is the same for inputs, sales and the machine and the tax reporting period is every month. Input VAT will exceed Output VAT in June 2017.</td>
</tr>
<tr>
<td>Time required to comply with 3 major taxes (hours per year)</td>
<td>The corporate income tax audit process: - An error in calculation of income tax liability (for example, use of incorrect tax depreciation rates, or incorrectly treating an expense as tax deductible) leads to an incorrect income tax return and a corporate income tax underpayment. TaxpayerCo. discovered the error and voluntarily notified the tax authority. The value of the underpaid income tax liability is 5% of the corporate income tax liability due. TaxpayerCo. submits corrected information after the deadline for submitting the annual tax return, but within the tax assessment period.</td>
</tr>

Note: The ranking of economies on the ease of paying taxes is determined by sorting their scores for paying taxes. These scores are the simple average of the scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax and contribution rate. The threshold is defined as the total tax and contribution rate at the 15th percentile of the overall distribution for all years included in the analysis up to and including Doing Business 2015, which is 26.1%. All economies with a total tax and contribution rate below this threshold receive the same score as the economy at the threshold.

**Notes**: Names of taxes have been standardized. For instance income tax, profit tax, tax on company's income are all named corporate income tax in this table.
The hours for VAT include all the VAT and sales taxes applicable.
The hours for Social Security include all the hours for labor taxes and mandatory contributions in general.
The postfiling index is the average of the scores on time to comply with VAT refund, time to obtain a VAT refund, time to comply with a corporate income tax correction and time to complete a corporate income tax correction.
N/A = Not applicable.
Trading across Borders

Doing Business records the time and cost associated with the logistical process of exporting and importing goods. Doing Business measures the time and cost (excluding tariffs) associated with three sets of procedures—documentary compliance, border compliance and domestic transport—within the overall process of exporting or importing a shipment of goods. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Documentary compliance</strong></td>
<td>To make the data comparable across economies, a few assumptions are made about the traded goods and the transactions:</td>
</tr>
<tr>
<td>• Obtaining, preparing and submitting documents during transport, clearance, inspections and port or border handling in origin economy</td>
<td><strong>Time:</strong> Time is measured in hours, and 1 day is 24 hours (for example, 22 days are recorded as $22 \times 24 = 528$ hours). If customs clearance takes 7.5 hours, the data are recorded as is. Alternatively, suppose documents are submitted to a customs agency at 8:00 a.m., are processed overnight and can be picked up at 8:00 a.m. the next day. The time for customs clearance would be recorded as 24 hours because the actual procedure took 24 hours.</td>
</tr>
<tr>
<td>• Obtaining, preparing and submitting documents required by destination economy and any transit economies</td>
<td><strong>Cost:</strong> Insurance cost and informal payments for which no receipt is issued are excluded from the costs recorded. Costs are reported in U.S. dollars. Contributors are asked to convert local currency into U.S. dollars based on the exchange rate prevailing on the day they answer the questionnaire. Contributors are private sector experts in international trade logistics and are informed about exchange rates.</td>
</tr>
<tr>
<td>• Covers all documents required by law and in practice, including electronic submissions of information</td>
<td><strong>Assumptions of the case study:</strong></td>
</tr>
<tr>
<td><strong>Border compliance</strong></td>
<td>- For all 190 economies covered by Doing Business, it is assumed a shipment is in a warehouse in the largest business city of the exporting economy and travels to a warehouse in the largest business city of the importing economy.</td>
</tr>
<tr>
<td>• Customs clearance and inspections</td>
<td>- It is assumed each economy imports 15 metric tons of containerized auto parts (HS 8708) from its natural import partner—the economy from which it imports the largest value (price times quantity) of auto parts. It is assumed each economy exports the product of its comparative advantage (defined by the largest export value) to its natural export partner—the economy that is the largest purchaser of this product.</td>
</tr>
<tr>
<td>• Inspections by other agencies (if applied to more than 20% of shipments)</td>
<td>- Shipment value is assumed to be $50,000.</td>
</tr>
<tr>
<td>• Handling and inspections that take place at the economy’s port or border</td>
<td>- The mode of transport is the one most widely used for the chosen export or import product and the trading partner, as is the seaport or land border crossing.</td>
</tr>
<tr>
<td><strong>Domestic transport</strong></td>
<td>- All electronic information submissions requested by any government agency in connection with the shipment are considered to be documents obtained, prepared and submitted during the export or import process.</td>
</tr>
<tr>
<td>• Loading or unloading of the shipment at the warehouse or port/border</td>
<td>- A port or border is a place (seaport or land border crossing) where merchandise can enter or leave an economy.</td>
</tr>
<tr>
<td>• Transport between warehouse and port/border</td>
<td>- Relevant government agencies include customs, port authorities, road police, border guards, standardization agencies, ministries or departments of agriculture or industry, national security agencies and any other government authorities.</td>
</tr>
<tr>
<td>• Traffic delays and road police checks while shipment is en route</td>
<td></td>
</tr>
</tbody>
</table>

Enforcing Contracts

The enforcing contracts indicator measures the time and cost for resolving a commercial dispute through a local first-instance court, and the quality of judicial processes index, evaluating whether each economy has adopted a series of good practices that promote quality and efficiency in the court system. The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Time required to enforce a contract through the courts (calendar days)</strong></td>
<td>The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement.</td>
</tr>
<tr>
<td>• Time to file and serve the case</td>
<td>To make the data comparable across economies, Doing Business uses several assumptions about the case:</td>
</tr>
<tr>
<td>• Time for trial and to obtain the judgment</td>
<td>- The dispute concerns a lawful transaction between two businesses (Seller and Buyer), both located in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Time to enforce the judgment</td>
<td>- The buyer orders custom-made goods, then fails to pay alleging that the goods are not of adequate quality.</td>
</tr>
<tr>
<td><strong>Cost required to enforce a contract through the courts (% of claim)</strong></td>
<td>- The seller sues the buyer before the court with jurisdiction over commercial cases worth 200% of income per capita or $5,000.</td>
</tr>
<tr>
<td>• Attorney fees</td>
<td>- The value of the dispute is 200% of the income per capita or the equivalent in local currency of USD 5,000, whichever is greater.</td>
</tr>
<tr>
<td>• Court fees</td>
<td>- The seller requests the pretrial attachment of the defendant’s movable assets to secure the claim.</td>
</tr>
<tr>
<td>• Enforcement fees</td>
<td>- The dispute on the quality of the goods requires an expert opinion.</td>
</tr>
<tr>
<td><strong>Quality of judicial processes index (0-18)</strong></td>
<td>- The judge decides in favor of the seller; there is no appeal.</td>
</tr>
<tr>
<td>• Court structure and proceedings (-1-5)</td>
<td>- The seller enforces the judgment through a public sale of the buyer’s movable assets.</td>
</tr>
<tr>
<td>• Case management (0-6)</td>
<td></td>
</tr>
<tr>
<td>• Court automation (0-4)</td>
<td></td>
</tr>
<tr>
<td>• Alternative dispute resolution (0-3)</td>
<td></td>
</tr>

Resolving Insolvency

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recovered by secured creditors through reorganization, liquidation or debt enforcement (foreclosure or receivership) proceedings. To determine the present value of the amount recovered by creditors, Doing Business uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit. The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
</table>
| **Time required to recover debt (years)**  
  • Measured in calendar years  
  • Appeals and requests for extension are included | To make the data on the time, cost and outcome comparable across economies, several assumptions about the business and the case are used:  
 - A hotel located in the largest city (or cities) has 201 employees and 50 suppliers. The hotel experiences financial difficulties.  
 - The value of the hotel is 100% of the income per capita or the equivalent in local currency of USD 200,000, whichever is greater.  
 - The hotel has a loan from a domestic bank, secured by a mortgage over the hotel’s real estate. The hotel cannot pay back the loan, but makes enough money to operate otherwise. |
| **Cost required to recover debt (% of debtor’s estate)**  
  • Measured as percentage of estate value  
  • Court fees  
  • Fees of insolvency administrators  
  • Lawyers’ fees  
  • Assessors’ and auctioneers’ fees  
  • Other related fees | In addition, Doing Business evaluates the quality of legal framework applicable to judicial liquidation and reorganization proceedings and the extent to which best insolvency practices have been implemented in each economy covered. |
| **Outcome**  
  • Whether business continues operating as a going concern or business assets are sold piecemeal | |
| **Recovery rate for creditors**  
  • Measures the cents on the dollar recovered by secured creditors  
  • Outcome for the business (survival or not) determines the maximum value that can be recovered  
  • Official costs of the insolvency proceedings are deducted  
  • Depreciation of furniture is taken into account  
  • Present value of debt recovered | |
| **Strength of insolvency framework index (0-16)**  
  • Sum of the scores of four component indices:  
  • Commencement of proceedings index (0-3)  
  • Management of debtor’s assets index (0-6)  
  • Reorganization proceedings index (0-3)  
  • Creditor participation index (0-4) | |

Figure - Resolving Insolvency in Nepal - Time and Cost

Note: The ranking of economies on the ease of resolving insolvency is determined by sorting their scores for resolving insolvency. These scores are the simple average of the scores for the recovery rate and the strength of insolvency framework index.
Note: Even if the economy’s legal framework includes provisions related to insolvency proceedings (liquidation or reorganization), the economy receives 0 points for the strength of insolvency framework index, if time, cost and outcome indicators are recorded as “no practice.”

Labor Market Regulation

Doing Business presents detailed data for the labor market regulation indicators on the Doing Business website (http://www.doingbusiness.org). The report does not present rankings of economies on these indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business.

The most recent round of data collection was completed in May 2018. See the methodology for more information.

<tr>
<td>(i) notice period for redundancy dismissal; (ii) severance payments due when terminating a redundant worker.</td>
<td>- Operates a supermarket or grocery store in the economy's largest business city.</td>
</tr>
<tr>
<td><strong>Job quality</strong></td>
<td>For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>(i) whether law mandates equal remuneration for work of equal value and nondiscrimination based on gender in hiring; (ii) whether law mandates paid or unpaid maternity leave; (iii) length of paid maternity leave; (iv) whether employees on maternity leave receive 100% of wages; (v) availability of five fully paid days of sick leave a year; (vi) eligibility requirements for unemployment protection.</td>
<td>- Has 60 employees.</td>
</tr>
</tbody>
</table>

Case study assumptions

- Is a cashier in a supermarket or grocery store, age 19, with one year of work experience.
- Is a full-time employee.
- Is not a member of the labor union, unless membership is mandatory.

The business:

- Is a limited liability company (or the equivalent in the economy).
- Operates a supermarket or grocery store in the economy's largest business city.
For 11 economies the data are also collected for the second largest business city.
- Has 60 employees.
- Is subject to collective bargaining agreements if such agreements cover more than 50% of the food retail sector and they apply even to firms that are not party to them.
- Abides by every law and regulation but does not grant workers more benefits than those mandated by law, regulation or (if applicable) collective bargaining agreements.

Severance pay for redundancy dismissal (average for workers with 1, 5 and 10 years of tenure): 22.9
Business Reforms in Nepal

In the past year, Doing Business observed a peaking of reform activity worldwide. From June 2, 2017, to May 1, 2018, 128 economies implemented a record 314 regulatory reforms improving the business climate. Reforms inspired by Doing Business have been implemented by economies in all regions. The following are reforms implemented since Doing Business 2008.

☑ = Doing Business reform making it easier to do business. ☒ = Change making it more difficult to do business.

DB2019

☒ Paying Taxes: Nepal made paying taxes more difficult by introducing a new labor contribution (gratuity contribution), medical insurance and accident insurance paid by the employer.

Labor Market Regulation: Nepal changed regulations pertaining to fixed-term contracts, probationary periods, working hours, paid maternity and sick leave, night work for women, third party approval in case of redundancy and unemployment protection.

DB2018

☑ Getting Credit: Nepal strengthened access to credit by operationalizing the existing law on secured transactions that implements a functional secured transactions system and establishes a centralized, notice-based, modern collateral registry.

☑ Protecting Minority Investors: Nepal strengthened minority investor protections by requiring greater corporate transparency.

DB2017

☒ Dealing with Construction Permits: Nepal made dealing with construction permits more difficult by increasing the cost of obtaining a building permit.

☒ Trading across Borders: Exporting in Nepal became more difficult due to an increase in the time and cost for documentary compliance following the introduction of a special vehicle permit requirement. At the same time, Nepal implemented the ASYCUDA World data management system, which expedited the customs clearance process.

DB2015

☑ Dealing with Construction Permits: Nepal made dealing with construction permits easier by implementing a new electronic building permit system.

DB2014

☑ Starting a Business: Nepal made starting a business easier by reducing the administrative processing time at the company registrar and by establishing a data link between agencies involved in the incorporation process.

DB2012

☑ Enforcing Contracts: Nepal improved oversight and monitoring in the court, speeding up the process for filing claims.

DB2010

☑ Registering Property: Nepal made transferring property easier by reducing the registration fee.

☑ Getting Credit: Nepal improved access to credit information by starting to distribute historical data.
Doing Business 2019 is the 16th in a series of annual reports investigating the regulations that enhance business activity and those that constrain it. The report provides quantitative indicators covering 11 areas of the business environment in 190 economies. The goal of the Doing Business series is to provide objective data for use by governments in designing sound business regulatory policies and to encourage research on the important dimensions of the regulatory environment for firms.
