About Doing Business

The Doing Business project provides objective measures of business regulations and their enforcement across 190 economies and selected cities at the subnational and regional level.

The Doing Business project, launched in 2002, looks at domestic small and medium-size companies and measures the regulations applying to them through their life cycle.

Doing Business captures several important dimensions of the regulatory environment as it applies to local firms. It provides quantitative indicators on regulation for starting a business, dealing with construction permits, getting electricity, registering property, getting credit, protecting minority investors, paying taxes, trading across borders, enforcing contracts and resolving insolvency. Doing Business also measures features of labor market regulation. Although Doing Business does not present rankings of economies on the labor market regulation indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business, it does present the data for these indicators.

By gathering and analyzing comprehensive quantitative data to compare business regulation environments across economies and over time, Doing Business encourages economies to compete towards more efficient regulation; offers measurable benchmarks for reform; and serves as a resource for academics, journalists, private sector researchers and others interested in the business climate of each economy.

In addition, Doing Business offers detailed subnational reports, which exhaustively cover business regulation and reform in different cities and regions within a nation. These reports provide data on the ease of doing business, rank each location, and recommend reforms to improve performance in each of the indicator areas. Selected cities can compare their business regulations with other cities in the economy or region and with the 190 economies that Doing Business has ranked.

The first Doing Business report, published in 2003, covered 5 indicator sets and 133 economies. This year’s report covers 11 indicator sets and 190 economies. Most indicator sets refer to a case scenario in the largest business city of each economy, except for 11 economies that have a population of more than 100 million as of 2013 (Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation and the United States) where Doing Business also collected data for the second largest business city. The data for these 11 economies are a population-weighted average for the 2 largest business cities. The project has benefited from feedback from governments, academics, practitioners and reviewers. The initial goal remains: to provide an objective basis for understanding and improving the regulatory environment for business around the world.

More about Doing Business (PDF, 5MB)
Ease of Doing Business in Uruguay

Region: Latin America & Caribbean
Income Category: High income
Population: 3,456,750
City Covered: Montevideo

DB 2019 Rank: 190
DB 2019 Ease of doing business score: 62.60

DB 2019 Ease of Doing Business Score

71.81: Chile (Rank: 56)
62.60: Uruguay (Rank: 95)
60.01: Brazil (Rank: 109)
58.97: Regional Average (Latin America & Caribbean)
58.80: Argentina (Rank: 119)
50.32: Bolivia (Rank: 156)

Note: The ease of doing business score captures the gap of each economy from the best regulatory performance observed on each of the indicators across all economies in the Doing Business sample since 2005. An economy's ease of doing business score is reflected on a scale from 0 to 100, where 0 represents the lowest and 100 represents the best performance. The ease of doing business ranking ranges from 1 to 190.

Rankings on Doing Business topics - Uruguay

Ease of Doing Business Score on Doing Business topics - Uruguay
Starting a Business

This topic measures the number of procedures, time, cost and paid-in minimum capital requirement for a small- to medium-sized limited liability company to start up and formally operate in each economy’s largest business city.

To make the data comparable across 190 economies, Doing Business uses a standardized business that is 100% domestically owned, has start-up capital equivalent to 10 times the income per capita, engages in general industrial or commercial activities and employs between 10 and 50 people one month after the commencement of operations, all of whom are domestic nationals. Starting a Business considers two types of local limited liability companies that are identical in all aspects, except that one company is owned by 5 married women and the other by 5 married men. The ranking of economies on the ease of starting a business is determined by sorting their scores for starting a business. These scores are the simple average of the scores for each of the component indicators.

The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<td></td>
</tr>
<tr>
<td>- Funds deposited in a bank or with third party before registration or up to 3 months after incorporation</td>
<td></td>
</tr>
</tbody>
</table>

To make the data comparable across economies, several assumptions about the business and the procedures are used. It is assumed that any required information is readily available and that the entrepreneur will pay no bribes.

**The business:**
- Is a limited liability company (or its legal equivalent). If there is more than one type of limited liability company in the economy, the most common among domestic firms is chosen. Information on the most common form is obtained from incorporation lawyers or the statistical office.
- Operates in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.
- The entire office space is approximately 929 square meters (10,000 square feet).
- Is 100% domestically owned and has five owners, none of whom is a legal entity; has a start-up capital of 10 times income per capita and has a turnover of at least 100 times income per capita.
- Performs general industrial or commercial activities, such as the production or sale of goods or services to the public. The business does not perform foreign trade activities and does not handle products subject to a special tax regime, for example, liquor or tobacco. It does not use heavily polluting production processes.
- Leases the commercial plant or offices and is not a proprietor of real estate and the amount of the annual lease for the office space is equivalent to the income per capita.
- Does not qualify for investment incentives or any special benefits.
- Has at least 10 and up to 50 employees one month after the commencement of operations, all of whom are domestic nationals.
- Has a company deed that is 10 pages long.

**The owners:**
- Have reached the legal age of majority. If there is no legal age of majority, they are assumed to be 30 years old.
- Are sane, competent, in good health and have no criminal record.
- Are married and the marriage is monogamous and registered with the authorities.
- Where the answer differs according to the legal system applicable to the woman or man in question (as may be the case in economies where there is legal plurality), the answer used will be the one that applies to the majority of the population.

Dealing with Construction Permits

This topic tracks the procedures, time and cost to build a warehouse—including obtaining necessary the licenses and permits, submitting all required notifications, requesting and receiving all necessary inspections and obtaining utility connections. In addition, the Dealing with Construction Permits indicator measures the building quality control index, evaluating the quality of building regulations, the strength of quality control and safety mechanisms, liability and insurance regimes, and professional certification requirements. The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>
<th>What the indicators measure</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedures to legally build a warehouse (number)</td>
<td>To make the data comparable across economies, several assumptions about the construction company, the warehouse project and the utility connections are used.</td>
</tr>
<tr>
<td>• Submitting all relevant documents and obtaining all necessary clearances, licenses, permits and certificates</td>
<td>The construction company (BuildCo):</td>
</tr>
<tr>
<td>• Submitting all required notifications and receiving all necessary inspections</td>
<td>- Is a limited liability company (or its legal equivalent) and operates in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
<tr>
<td>• Obtaining utility connections for water and sewerage</td>
<td>- Is 100% domestically and privately owned; has five owners, none of whom is a legal entity. Has a licensed architect and a licensed engineer, both registered with the local association of architects or engineers. BuildCo is not assumed to have any other employees who are technical or licensed experts, such as geological or topographical experts.</td>
</tr>
<tr>
<td>• Registering and selling the warehouse after its completion</td>
<td>- Owns the land on which the warehouse will be built and will sell the warehouse upon its completion.</td>
</tr>
<tr>
<td><strong>Time required to complete each procedure (calendar days)</strong></td>
<td>The warehouse:</td>
</tr>
<tr>
<td>• Does not include time spent gathering information</td>
<td>- Will be used for general storage activities, such as storage of books or stationery.</td>
</tr>
<tr>
<td>• Each procedure starts on a separate day—though procedures that can be fully completed online are an exception to this rule</td>
<td>- Will have two stories, both above ground, with a total constructed area of approximately 1,300.6 square meters (14,000 square feet). Each floor will be 3 meters (9 feet, 10 inches) high and will be located on a land plot of approximately 929 square meters (10,000 square feet) that is 100% owned by BuildCo, and the warehouse is valued at 50 times income per capita.</td>
</tr>
<tr>
<td>• Procedure is considered completed once final document is received</td>
<td>- Will have complete architectural and technical plans prepared by a licensed architect. If preparation of the plans requires such steps as obtaining further documentation or getting prior approvals from external agencies, these are counted as procedures.</td>
</tr>
<tr>
<td>• No prior contact with officials</td>
<td>- Will take 30 weeks to construct (excluding all delays due to administrative and regulatory requirements).</td>
</tr>
<tr>
<td><strong>Cost required to complete each procedure (% of income per capita)</strong></td>
<td>The water and sewerage connections:</td>
</tr>
<tr>
<td>• Official costs only, no bribes</td>
<td>- Will be 150 meters (492 feet) from the existing water source and sewer tap. If there is no water delivery infrastructure in the economy, a borehole will be dug. If there is no sewage infrastructure, a septic tank in the smallest size available will be installed or built.</td>
</tr>
<tr>
<td><strong>Building quality control index (0-15)</strong></td>
<td>- Will have an average water use of 662 liters (175 gallons) a day and an average wastewater flow of 568 liters (150 gallons) a day. Will have a peak water use of 1,325 liters (350 gallons) a day and a peak wastewater flow of 1,136 liters (300 gallons) a day.</td>
</tr>
<tr>
<td>• Quality of building regulations (0-2)</td>
<td>- Will have a constant level of water demand and wastewater flow throughout the year; will be 1 inch in diameter for the water connection and 4 inches in diameter for the sewerage connection.</td>
</tr>
<tr>
<td>• Quality control before construction (0-1)</td>
<td></td>
</tr>
<tr>
<td>• Quality control during construction (0-3)</td>
<td></td>
</tr>
<tr>
<td>• Quality control after construction (0-3)</td>
<td></td>
</tr>
<tr>
<td>• Liability and insurance regimes (0-2)</td>
<td></td>
</tr>
<tr>
<td>• Professional certifications (0-4)</td>
<td></td>
</tr>

### Getting Electricity

This topic measures the procedures, time and cost required for a business to obtain a permanent electricity connection for a newly constructed warehouse. Additionally, the reliability of supply and transparency of tariffs index measures reliability of supply, transparency of tariffs and the price of electricity. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

#### What the indicators measure

**Procedures to obtain an electricity connection (number)**
- Submitting all relevant documents and obtaining all necessary clearances and permits
- Completing all required notifications and receiving all necessary inspections
- Obtaining external installation works and possibly purchasing material for these works
- Concluding any necessary supply contract and obtaining final supply

**Time required to complete each procedure (calendar days)**
- Is at least 1 calendar day
- Each procedure starts on a separate day
- Does not include time spent gathering information
- Reflects the time spent in practice, with little follow-up and no prior contact with officials

**Cost required to complete each procedure (% of income per capita)**
- Official costs only, no bribes
- Value added tax excluded

**The reliability of supply and transparency of tariffs index (0-8)**
- Duration and frequency of power outages (0-3)
- Tools to monitor power outages (0-1)
- Tools to restore power supply (0-1)
- Regulatory monitoring of utilities’ performance (0-1)
- Financial deterrents limiting outages (0-1)
- Transparency and accessibility of tariffs (0-1)

**Price of electricity (cents per kilowatt-hour)**
- Price based on monthly bill for commercial warehouse in case study

*Note: Doing Business measures the price of electricity, but it is not included in the ease of doing business score nor the ranking on the ease of getting electricity.*

---

#### Case study assumptions

To make the data comparable across economies, several assumptions about the warehouse, the electricity connection and the monthly consumption are used.

**The warehouse:**
- Is owned by a local entrepreneur and is used for storage of goods.
- Is located in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.
- Is located in an area where similar warehouses are typically located and is in an area with no physical constraints. For example, the property is not near a railway.
- Is a new construction and is being connected to electricity for the first time.
- Has two stories with a total surface area of approximately 1,300.6 square meters (14,000 square feet). The plot of land on which it is built is 929 square meters (10,000 square feet).

**The electricity connection:**
- Is a permanent one with a three-phase, four-wire Y connection with a subscribed capacity of 140-kilo-volt-ampere (kVA) with a power factor of 1, when 1 kVA = 1 kilowatt (kW).
- Has a length of 150 meters. The connection is to either the low- or medium-voltage distribution network and is either overhead or underground, whichever is more common in the area where the warehouse is located and requires works that involve the crossing of a 10-meter road (such as by excavation or overhead lines) but are all carried out on public land. There is no crossing of other owners' private property because the warehouse has access to a road.
- Does not require work to install the internal wiring of the warehouse. This has already been completed up to and including the customer's service panel or switchboard and the meter base.

**The monthly consumption:**
- It is assumed that the warehouse operates 30 days a month from 9:00 a.m. to 5:00 p.m. (8 hours a day), with equipment utilized at 80% of capacity on average and that there are no electricity cuts (assumed for simplicity reasons) and the monthly energy consumption is 26,880 kilowatt-hours (kWh); hourly consumption is 112 kWh.
- If multiple electricity suppliers exist, the warehouse is served by the cheapest supplier.
- Tariffs effective in January of the current year are used for calculation of the price of electricity for the warehouse. Although January has 31 days, for calculation purposes only 30 days are used.

| 1   | Submit application to UTE and await estimate  
*Agency: Administración Nacional de Usinas y Transmisión Eléctrica (UTE)*  
The application to the distribution company must be submitted by an authorized electrician. The client have to hired one. The distributor company, under the oversight of the regulatory agency, registers the electricians.  
UTE requires that the electrician submit to submit certain documents at the time of the submission of the connection application (indicating the power needed and the location of the external works). The applicant then awaits the preparation of the quote.  
Sometimes the utility needs to do an inspection to prepare a feasibility study, depending on the required load. In our case it is necessary to do an inspection in order to prepare the quote. | 15 calendar days | UYU 0 |
| 2   | Receive site inspection by UTE for preparing estimate  
*Agency: Administración Nacional de Usinas y Transmisión Eléctrica (UTE)*  
UTE inspects the site of the client in order to do the quote of the required connection works | 1 calendar day | UYU 0 |
| 3   | Have electrician sign assumption of responsibility at UTE office  
*Agency: Administración Nacional de Usinas y Transmisión Eléctrica (UTE)*  
Administración Nacional de Usinas y Transmisión Eléctrica (UTE) does not supervise the internal wiring, the electrician who did the internal wiring (usually an electrician of medium technical training) must submit an document certifying that the internal wiring is done in accordance to the reglementation. It has to be done by a electrician chosen by the client and registered at UTE. | 1 calendar day | UYU 0 |
| 4   | Pay estimate, sign contract and await external works by UTE  
*Agency: Administración Nacional de Usinas y Transmisión Eléctrica (UTE)*  
The payment of the quote is required prior to the beginning of the external works carried on by UTE. The external connection works requires the laying of low voltage underground cable (400 V). The electrician of the customer only has to prepare the box for the meter. | 30 calendar days | UYU 51,126 |
| 5   | Sign supply contract and receive meter installation and electricity flow from UTE  
*Agency: Administración Nacional de Usinas y Transmisión Eléctrica (UTE)*  
The client or his legal representative signs the supply contract in one of the commercial offices of Administración Nacional de Usinas y Transmisión Eléctrica (UTE). This procedure can not be done by the electrician.  
The meter is then installed by another department of UTE that the one in charge of the external works. When the team in charge of laying the underground cables finished the work, they issue a work order to the Technical Department. The team of the Technical Department have 2 days to install the meter. | 2 calendar days | UYU 0 |

* Takes place simultaneously with previous procedure.

</tbody>
</table>

**Note:**

If the duration and frequency of outages is 100 or less, the economy is eligible to score on the Reliability of supply and transparency of tariff index.

If the duration and frequency of outages is not available, or is over 100, the economy is not eligible to score on the index.

If the minimum outage time considered for SAIDI/SAIFI is over 5 minutes, the economy is not eligible to score on the index.
Registering Property

This topic examines the steps, time and cost involved in registering property, assuming a standardized case of an entrepreneur who wants to purchase land and a building that is already registered and free of title dispute. In addition, the topic also measures the quality of the land administration system in each economy. The quality of land administration index has five dimensions: reliability of infrastructure, transparency of information, geographic coverage, land dispute resolution, and equal access to property rights. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

<td>A public notary prepares the sale and purchase agreement. The participation of a notary is mandatory, otherwise the deed would not be valid. The notary fees are regulated by the “Asociación de Escribanos del Uruguay” (or Uruguayan Notary Association) setting the official fees (sometimes notaries might charge less than the official rate). The seller is responsible for gathering all the documentation to be presented to the public notary. Once the sale agreement is ready it must be signed by the seller and the buyer, and the notary collects the money to pay the transfer tax (4% of the cadastral value, paid half by buyer and half by seller). The documentation shall include:</td>

Getting Credit

This topic explores two sets of issues—the strength of credit reporting systems and the effectiveness of collateral and bankruptcy laws in facilitating lending. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

### What the indicators measure

**Strength of legal rights index (0-12)**
- Rights of borrowers and lenders through collateral laws (0-10)
- Protection of secured creditors’ rights through bankruptcy laws (0-2)

**Depth of credit information index (0-8)**
- Scope and accessibility of credit information distributed by credit bureaus and credit registries (0-8)

**Credit bureau coverage (% of adults)**
- Number of individuals and firms listed in largest credit bureau as a percentage of adult population

**Credit registry coverage (% of adults)**
- Number of individuals and firms listed in credit registry as a percentage of adult population

### Case study assumptions

Doing Business assesses the sharing of credit information and the legal rights of borrowers and lenders with respect to secured transactions through 2 sets of indicators. The depth of credit information index measures rules and practices affecting the coverage, scope and accessibility of credit information available through a credit registry or a credit bureau. The strength of legal rights index measures the degree to which collateral and bankruptcy laws protect the rights of borrowers and lenders and thus facilitate lending. For each economy it is first determined whether a unitary secured transactions system exists. Then two case scenarios, case A and case B, are used to determine how a nonpossessory security interest is created, publicized and enforced according to the law. Special emphasis is given to how the collateral registry operates (if registration of security interests is possible). The case scenarios involve a secured borrower, company ABC, and a secured lender, BizBank.

In some economies the legal framework for secured transactions will allow only case A or case B (not both) to apply. Both cases examine the same set of legal provisions relating to the use of movable collateral.

#### Several assumptions about the secured borrower (ABC) and lender (BizBank) are used:

- ABC is a domestic limited liability company (or its legal equivalent).
- ABC has up to 50 employees.
- ABC has its headquarters and only base of operations in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.
- Both ABC and BizBank are 100% domestically owned.

The case scenarios also involve assumptions. In case A, as collateral for the loan, ABC grants BizBank a nonpossessory security interest in one category of movable assets, for example, its machinery or its inventory. ABC wants to keep both possession and ownership of the collateral. In economies where the law does not allow nonpossessory security interests in movable property, ABC and BizBank use a fiduciary transfer-of-title arrangement (or a similar substitute for nonpossessory security interests).

In case B, ABC grants BizBank a business charge, enterprise charge, floating charge or any charge that gives BizBank a security interest over ABC’s combined movable assets (or as much of ABC’s movable assets as possible). ABC keeps ownership and possession of the assets.

Protecting Minority Investors

This topic measures the strength of minority shareholder protections against misuse of corporate assets by directors for their personal gain as well as shareholder rights, governance safeguards and corporate transparency requirements that reduce the risk of abuse. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

What the indicators measure

- **Extent of disclosure index (0–10):** Review and approval requirements for related-party transactions; Disclosure requirements for related-party transactions
- **Extent of director liability index (0–10):** Ability of minority shareholders to sue and hold interested directors liable for prejudicial related-party transactions; Available legal remedies (damages, disgorgement of profits, fines, imprisonment, rescission of the transaction)
- **Ease of shareholder suits index (0–10):** Access to internal corporate documents; Evidence obtainable during trial and allocation of legal expenses
- **Extent of conflict of interest regulation index (0–10):** Shareholders' rights and role in major corporate decisions
- **Extent of ownership and control index (0–10):** Governance safeguards protecting shareholders from undue board control and entrenchment
- **Extent of corporate transparency index (0–10):** Corporate transparency on ownership stakes, compensation, audits and financial prospects
- **Extent of shareholder governance index (0–10):** Simple average of the extent of shareholders rights, extent of ownership and control and extent of corporate transparency indices
- **Strength of minority investor protection index (0–10):** Simple average of the extent of conflict of interest regulation and extent of shareholder governance indices

Case study assumptions

To make the data comparable across economies, a case study uses several assumptions about the business and the transaction.

The business (Buyer):
- Is a publicly traded corporation listed on the economy’s most important stock exchange. If there are fewer than ten listed companies or if there is no stock exchange in the economy, it is assumed that Buyer is a large private company with multiple shareholders.
- Has a board of directors and a chief executive officer (CEO) who may legally act on behalf of Buyer where permitted, even if this is not specifically required by law.
- Has a supervisory board in economies with a two-tier board system on which Mr. James appointed 60% of the shareholder-elected members.
- Has not adopted bylaws or articles of association that go beyond the minimum requirements. Does not follow codes, principles, recommendations or guidelines that are not mandatory.
- Is a manufacturing company with its own distribution network.

The transaction involves the following details:
- Mr. James owns 60% of Buyer, sits on Buyer’s board of directors and elected two directors to Buyer’s five-member board.
- Mr. James also owns 90% of Seller, a company that operates a chain of retail hardware stores. Seller recently closed a large number of its stores.
- Mr. James proposes that Buyer purchase Seller’s unused fleet of trucks to expand Buyer’s distribution of its food products, a proposal to which Buyer agrees. The price is equal to 10% of Buyer’s assets and is higher than the market value.
- The proposed transaction is part of the company’s principal activity and is not outside the authority of the company.
- Buyer enters into the transaction. All required approvals are obtained, and all required disclosures made—that is, the transaction was not entered into fraudulently.
- The transaction causes damages to Buyer. Shareholders sue Mr. James and the executives and directors that approved the transaction.

### Paying Taxes

This topic records the taxes and mandatory contributions that a medium-size company must pay or withhold in a given year, as well as the administrative burden of paying taxes and contributions and complying with postfiling procedures (VAT refund and tax audit). The most recent round of data collection for the project was completed in May 2018 covering for the Paying Taxes indicator calendar year 2017 (January 1, 2017 - December 31, 2017). See the methodology for more information.

### What the indicators measure

<table>
<thead>
<tr>
<th><strong>Tax payments for a manufacturing company in 2017 (number per year adjusted for electronic and joint filing and payment)</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Total number of taxes and contributions paid or withheld, including consumption taxes (value added tax, sales tax or goods and service tax)</td>
</tr>
<tr>
<td>• Method and frequency of filing and payment</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Time required to comply with 3 major taxes (hours per year)</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Collecting information, computing tax payable</td>
</tr>
<tr>
<td>• Preparing separate tax accounting books, if required</td>
</tr>
<tr>
<td>• Completing tax return, filing with agencies</td>
</tr>
<tr>
<td>• Arranging payment or withholding</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Total tax and contribution rate (% of commercial profits)</strong></th>
</tr>

</tr>
<tr>
<td>• Waste collection, vehicle, road and other taxes</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Postfiling Index</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Time to comply with a VAT refund (hours)</td>
</tr>
<tr>
<td>• Time to obtain a VAT refund (weeks)</td>
</tr>
<tr>
<td>• Time to comply with a corporate income tax correction (hours)</td>
</tr>
<tr>
<td>• Time to complete a corporate income tax correction (weeks)</td>
</tr>
</tbody>
</table>

### Case study assumptions

Using a case scenario, Doing Business records taxes and mandatory contributions a medium size company must pay in a year, and measures the administrative burden of paying taxes, contributions and dealing with postfiling processes. Information is also compiled on frequency of filing and payments, time taken to comply with tax laws, time taken to comply with the requirements of postfiling processes and time waiting.

To make data comparable across economies, several assumptions are used:
- TaxpayerCo is a medium-size business that started operations on January 1, 2016. It produces ceramic flowerpots and sells them at retail. All taxes and contributions recorded are paid in the second year of operation (calendar year 2017). Taxes and mandatory contributions are measured at all levels of government.

**The VAT refund process:**
- In June 2017, TaxpayerCo makes a large capital purchase: the value of the machine is 65 times income per capita of the economy. Sales are equally spread per month (1,050 times income per capita divided by 12) and cost of goods sold are equally expensed per month (875 times income per capita divided by 12). The machinery seller is registered for VAT and excess input VAT incurred in June will be fully recovered after four consecutive months if the VAT rate is the same for inputs, sales and the machine and the tax reporting period is every month. Input VAT will exceed Output VAT in June 2017.

**The corporate income tax audit process:**
- An error in calculation of income tax liability (for example, use of incorrect tax depreciation rates, or incorrectly treating an expense as tax deductible) leads to an incorrect income tax return and a corporate income tax underpayment. TaxpayerCo discovered the error and voluntarily notified the tax authority. The value of the underpaid income tax liability is 5% of the corporate income tax liability due. TaxpayerCo submits corrected information after the deadline for submitting the annual tax return, but within the tax assessment period.
Paying Taxes - Uruguay

</table>

Note: The ranking of economies on the ease of paying taxes is determined by sorting their scores for paying taxes. These scores are the simple average of the scores for each of the component indicators, with a threshold and a nonlinear transformation applied to one of the component indicators, the total tax and contribution rate. The threshold is defined as the total tax and contribution rate at the 15th percentile of the overall distribution for all years included in the analysis up to and including Doing Business 2015, which is 26.1%. All economies with a total tax and contribution rate below this threshold receive the same score as the economy at the threshold.

<td>No tax audit per case study scenario</td>
</tr>
</tbody>
</table>

#### Notes: Names of taxes have been standardized. For instance income tax, profit tax, tax on company's income are all named corporate income tax in this table.

The hours for VAT include all the VAT and sales taxes applicable.

The hours for Social Security include all the hours for labor taxes and mandatory contributions in general.

The postfiling index is the average of the scores on time to comply with VAT refund, time to obtain a VAT refund, time to comply with a corporate income tax correction and time to complete a corporate income tax correction.

N/A = Not applicable.
Trading across Borders

Doing Business records the time and cost associated with the logistical process of exporting and importing goods. Doing Business measures the time and cost (excluding tariffs) associated with three sets of procedures—documentary compliance, border compliance and domestic transport—within the overall process of exporting or importing a shipment of goods. The most recent round of data collection for the project was completed in May 2018. See the methodology for more information.

What the indicators measure

**Documentary compliance**
- Obtaining, preparing and submitting documents during transport, clearance, inspections and port or border handling in origin economy
- Obtaining, preparing and submitting documents required by destination economy and any transit economies
- Covers all documents required by law and in practice, including electronic submissions of information

**Border compliance**
- Customs clearance and inspections
- Inspections by other agencies (if applied to more than 20% of shipments)
- Handling and inspections that take place at the economy’s port or border

**Domestic transport**
- Loading or unloading of the shipment at the warehouse or port/border
- Transport between warehouse and port/border
- Traffic delays and road police checks while shipment is en route

Case study assumptions

To make the data comparable across economies, a few assumptions are made about the traded goods and the transactions:

**Time:** Time is measured in hours, and 1 day is 24 hours (for example, 22 days are recorded as 22 × 24 = 528 hours). If customs clearance takes 7.5 hours, the data are recorded as is. Alternatively, suppose documents are submitted to a customs agency at 8:00 a.m., are processed overnight and can be picked up at 8:00 a.m. the next day. The time for customs clearance would be recorded as 24 hours because the actual procedure took 24 hours.

**Cost:** Insurance cost and informal payments for which no receipt is issued are excluded from the costs recorded. Costs are reported in U.S. dollars. Contributors are asked to convert local currency into U.S. dollars based on the exchange rate prevailing on the day they answer the questionnaire. Contributors are private sector experts in international trade logistics and are informed about exchange rates.

**Assumptions of the case study:**
- For all 190 economies covered by Doing Business, it is assumed a shipment is in a warehouse in the largest business city of the exporting economy and travels to a warehouse in the largest business city of the importing economy.
- It is assumed each economy imports 15 metric tons of containerized auto parts (HS 8708) from its natural import partner—the economy from which it imports the largest value (price times quantity) of auto parts. It is assumed each economy exports the product of its comparative advantage (defined by the largest export value) to its natural export partner—the economy that is the largest purchaser of this product. Shipment value is assumed to be $50,000.
- The mode of transport is the one most widely used for the chosen export or import product and the trading partner, as is the seaport or land border crossing.
- All electronic information submissions requested by any government agency in connection with the shipment are considered to be documents obtained, prepared and submitted during the export or import process.
- A port or border is a place (seaport or land border crossing) where merchandise can enter or leave an economy.
- Relevant government agencies include customs, port authorities, road police, border guards, standardization agencies, ministries or departments of agriculture or industry, national security agencies and any other government authorities.

## Enforcing Contracts

The enforcing contracts indicator measures the time and cost for resolving a commercial dispute through a local first-instance court, and the quality of judicial processes index, evaluating whether each economy has adopted a series of good practices that promote quality and efficiency in the court system. The most recent round of data collection was completed in May 2018. See the methodology for more information.

### What the indicators measure

<table>
<thead>
<tr>
<th>Time required to enforce a contract through the courts (calendar days)</th>
<th>Case study assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Time to file and serve the case</td>
<td>The dispute in the case study involves the breach of a sales contract between 2 domestic businesses. The case study assumes that the court hears an expert on the quality of the goods in dispute. This distinguishes the case from simple debt enforcement.</td>
</tr>
<tr>
<td>• Time for trial and to obtain the judgment</td>
<td>To make the data comparable across economies, Doing Business uses several assumptions about the case:</td>
</tr>
<tr>
<td>• Time to enforce the judgment</td>
<td>- The dispute concerns a lawful transaction between two businesses (Seller and Buyer), both located in the economy’s largest business city. For 11 economies the data are also collected for the second largest business city.</td>
</tr>
</tbody>
</table>

### Cost required to enforce a contract through the courts (% of claim)

<table>
<thead>
<tr>
<th>Attorneys fees</th>
<th>Court fees</th>
<th>Enforcement fees</th>
</tr>
</thead>
</table>

### Quality of judicial processes index (0-18)

<table>
<thead>
<tr>
<th>Court structure and proceedings (-1-5)</th>
<th>Case management (0-6)</th>
<th>Court automation (0-4)</th>
<th>Alternative dispute resolution (0-3)</th>
</tr>
</thead>
</table>

Attorney fees
- Court fees
- Enforcement fees

The buyer orders custom-made goods, then fails to pay alleging that the goods are not of adequate quality.
- The seller sues the buyer before the court with jurisdiction over commercial cases worth 200% of income per capita or $5,000.
- The seller requests the pretrial attachment of the defendant’s movable assets to secure the claim.
- The judge decides in favor of the seller; there is no appeal.
- The seller enforces the judgment through a public sale of the buyer’s movable assets.

### Quality of Judicial Processes Index (0-18)

#### Court Structure and Proceedings (1-5)

1. Is there a court or division of a court dedicated solely to hearing commercial cases?  
   - No  
   - Score: 0.0

2. Small claims court
   - 2.a. Is there a small claims court or a fast-track procedure for small claims?  
     - No  
     - Score: 0.0
   - 2.b. If yes, is self-representation allowed?  
     - n.a.

3. Is pretrial attachment available?  
   - Yes  
   - Score: 1.0

4. Are new cases assigned randomly to judges?  
   - Yes, automatic  
   - Score: 1.0

5. Does a woman’s testimony carry the same evidentiary weight in court as a man’s?  
   - Yes  
   - Score: 0.0

#### Case Management (0-6)

1. Time Standards
   - 1.a. Are there laws setting overall time standards for key court events in a civil case?  
     - Yes  
   - 1.b. If yes, are the time standards set for at least three court events?  
     - Yes  
   - 1.c. Are these time standards respected in more than 50% of cases?  
     - Yes

2. Adjournments
   - 2.a. Does the law regulate the maximum number of adjournments that can be granted?  
     - No  
   - 2.b. Are adjournments limited to unforeseen and exceptional circumstances?  
     - No  
   - 2.c. If rules on adjournments exist, are they respected in more than 50% of cases?  
     - n.a.

3. Can two of the following four reports be generated about the competent court: (i) time to disposition report; (ii) clearance rate report; (iii) age of pending cases report; and (iv) single case progress report?  
   - No  
   - Score: 0.0

4. Is a pretrial conference among the case management techniques used before the competent court?  
   - No  
   - Score: 0.0

5. Are there any electronic case management tools in place within the competent court for use by judges?  
   - Yes  
   - Score: 1.0

6. Are there any electronic case management tools in place within the competent court for use by lawyers?  
   - Yes  
   - Score: 1.0

#### Court Automation (0-4)

1. Can the initial complaint be filed electronically through a dedicated platform within the competent court?  
   - No  
   - Score: 0.0

2. Is it possible to carry out service of process electronically for claims filed before the competent court?  
   - No  
   - Score: 0.0

3. Can court fees be paid electronically within the competent court?  
   - No  
   - Score: 0.0

4. Publication of Judgments
   - 4.a Are judgments rendered in commercial cases at all levels made available to the general public through publication in official gazettes, in newspapers or on the internet or court website?  
     - Yes  
   - 4.b Are judgments rendered in commercial cases at the appellate and supreme court level made available to the general public through publication in official gazettes, in newspapers or on the internet or court website?  
     - Yes

#### Alternative Dispute Resolution (0-3)

1. Arbitration  
   - Score: 1.5
<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>

<tbody>
<tr>
<td>1.a. Is domestic commercial arbitration governed by a consolidated law or consolidated chapter or section of the applicable code of civil procedure encompassing substantially all its aspects?</td>
<td>Yes</td>
</tr>
<tr>
<td>1.b. Are there any commercial disputes—aside from those that deal with public order or public policy—that cannot be submitted to arbitration?</td>
<td>No</td>
</tr>
<tr>
<td>1.c. Are valid arbitration clauses or agreements usually enforced by the courts?</td>
<td>Yes</td>
</tr>
<tr>
<td>2. Mediation/Conciliation</td>
<td>0.5</td>
</tr>
<tr>
<td>2.a. Is voluntary mediation or conciliation available?</td>
<td>Yes</td>
</tr>
<tr>
<td>2.b. Are mediation, conciliation or both governed by a consolidated law or consolidated chapter or section of the applicable code of civil procedure encompassing substantially all their aspects?</td>
<td>No</td>
</tr>
<tr>
<td>2.c. Are there financial incentives for parties to attempt mediation or conciliation (i.e., if mediation or conciliation is successful, a refund of court filing fees, income tax credits or the like)?</td>
<td>No</td>
</tr>
</tbody>
</table>
Resolving Insolvency

Doing Business studies the time, cost and outcome of insolvency proceedings involving domestic legal entities. These variables are used to calculate the recovery rate, which is recorded as cents on the dollar recovered by secured creditors through reorganization, liquidation or debt enforcement (foreclosure or receivership) proceedings. To determine the present value of the amount recovered by creditors, Doing Business uses the lending rates from the International Monetary Fund, supplemented with data from central banks and the Economist Intelligence Unit. The most recent round of data collection was completed in May 2018. See the methodology for more information.

### What the indicators measure

<table>
<thead>
<tr>
<th>Time required to recover debt (years)</th>
<th>Cost required to recover debt (% of debtor’s estate)</th>
<th>Outcome</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Measured in calendar years</td>
<td>• Measured as percentage of estate value</td>
<td>• Whether business continues operating as a going concern or business assets are sold piecemeal</td>
</tr>
<tr>
<td>• Appeals and requests for extension are included</td>
<td>• Court fees</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Fees of insolvency administrators</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Lawyers’ fees</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Assessors’ and auctioneers’ fees</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Other related fees</td>
<td></td>
</tr>
</tbody>
</table>

### Case study assumptions

To make the data on the time, cost and outcome comparable across economies, several assumptions about the business and the case are used:

- A hotel located in the largest city (or cities) has 201 employees and 50 suppliers. The hotel experiences financial difficulties.
- The value of the hotel is 100% of the income per capita or the equivalent in local currency of USD 200,000, whichever is greater.
- The hotel has a loan from a domestic bank, secured by a mortgage over the hotel’s real estate. The hotel cannot pay back the loan, but makes enough money to operate otherwise.

In addition, Doing Business evaluates the quality of legal framework applicable to judicial liquidation and reorganization proceedings and the extent to which best insolvency practices have been implemented in each economy covered.

### Strength of insolvency framework index (0-16)

- Sum of the scores of four component indices:
  - Commencement of proceedings index (0-3)
  - Management of debtor’s assets index (0-6)
  - Reorganization proceedings index (0-3)
  - Creditor participation index (0-4)

</thead>
<tbody>
<tr>
<td>Proceeding</td>
<td>foreclosure</td>
<td></td>
</tr>
<tr>
<td></td>
<td>After Mirage's default, BizBank would enforce its security interest over Mirage's assets as the debenture holder and initiate foreclosure proceeding. Henceforward, Mirage will try to start an insolvency proceeding of reorganization (concurso mercantil) aimed at stay the enforcement procedures and rescue the economically viable business. The commencement of the reorganization proceeding (concurso) will automatically suspend the enforcement action for a period of 120 days (Law 18.387). However, it is very unlikely that an agreement is reached between the Bank and the company, as the bank will prefer to maximize the benefit of a foreclosure and satisfied its debt by the sale of the estate in a public auction.</td>
<td></td>
</tr>
<tr>
<td>Outcome</td>
<td>piecemeal sale</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The hotel will cease operations and it assets will be sold at piecemeal in a public auction. The aforementioned without prejudice of a potential sale of the economic unit of the company, according to article 172 of Law 18,387. It is the theoretically and preferable option giving the multiplicity of creditors.</td>
<td></td>
</tr>
<tr>
<td>Time (in years)</td>
<td>1.8</td>
<td></td>
</tr>
<tr>
<td></td>
<td>It would take 21 months to resolve the foreclosure proceeding in Montevideo from the moment of the debtor's default until the debt is repaid to the secured creditor. The estimate is based assuming that the creditor will commence foreclosure proceedings, that the debtor will file for insolvency proceedings and that the suspension of the enforcement action takes place. The foreclosure will continue until the estate is sold in public auction. It will take about a year for the sale itself.</td>
<td></td>
</tr>
<tr>
<td>Cost (% of estate)</td>
<td>7.0</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The costs associated with the reorganization proceeding would amount to approximately cost 7% of the value of the estate based on the following breakdown: Judicial fees (1%), attorney’s fees (5%) based on the fee schedule of the bar association and fees of other professionals (1%)</td>
<td></td>
</tr>
<tr>
<td>Recovery rate (cents on the dollar)</td>

**Note:** Even if the economy’s legal framework includes provisions related to insolvency proceedings (liquidation or reorganization), the economy receives 0 points for the strength of insolvency framework index, if time, cost and outcome indicators are recorded as “no practice.”
Labor Market Regulation

Doing Business presents detailed data for the labor market regulation indicators on the Doing Business website (http://www.doingbusiness.org). The report does not present rankings of economies on these indicators or include the topic in the aggregate ease of doing business score or ranking on the ease of doing business.

The most recent round of data collection was completed in May 2018. See the methodology for more information.

<table>
<thead>
<tr>

Business Reforms in Uruguay

In the past year, Doing Business observed a peaking of reform activity worldwide. From June 2, 2017, to May 1, 2018, 128 economies implemented a record 314 regulatory reforms improving the business climate. Reforms inspired by Doing Business have been implemented by economies in all regions. The following are reforms implemented since Doing Business 2008.

✓ = Doing Business reform making it easier to do business. × = Change making it more difficult to do business.

DB2019

✓ Dealing with Construction Permits: Uruguay improved the quality of its building regulations by creating an online portal providing information on the requirements and fees to obtain a building permit.

DB2018

× Starting a Business: Uruguay made starting a business more costly by increasing the value of the official fiscal unit used for the payment of government fees and by increasing business incorporation fees. The cost increased in nominal terms but not in real terms.

✓ Paying Taxes: Uruguay made paying taxes easier by enhancing the features of the online portal used for filing and paying taxes and making electronic payments compulsory.

DB2017

× Starting a Business: Uruguay made starting a business more costly by increasing the value of the official fiscal unit used for the payment of government fees.

✓ Paying Taxes: Uruguay made paying taxes easier by introducing an electronic system for paying social security contributions. Online filing was already in place.

DB2016

× Starting a Business: Uruguay made starting a business more difficult by increasing incorporation costs.

× Registering Property: Uruguay made registering property more difficult by requiring by law a certificate of connection of the property to the public sewage system to complete the process of transferring and registering property.

✓ Paying Taxes: Uruguay made paying taxes easier for companies by continually upgrading and improving the electronic system for filing and paying the major taxes.

DB2015

✓ Getting Credit: Uruguay improved access to credit information by beginning to distribute positive credit data in addition to negative data.

✓ Trading across Borders: Uruguay made trading across borders easier by implementing a risk-based inspection system that reduced customs clearance time for both exports and imports.

✓ Enforcing Contracts: Uruguay made enforcing contracts easier by simplifying and speeding up the proceedings for commercial disputes.

DB2014

✓ Trading across Borders: Uruguay made trading across borders easier by implementing an electronic customs declaration system.

DB2013

✓ Paying Taxes: Uruguay made paying taxes easier for small and medium-size companies by fully implementing an online filing and payment system for capital, value added and corporate income taxes and by improving the online facilities for social security contributions.

✓ Trading across Borders: Uruguay reduced the time to import by improving port efficiency and introducing electronic payment and predeclaration systems for customs.

DB2012

✓ Starting a Business: Uruguay made starting a business easier by establishing a one-stop shop for general commercial companies.

✓ Getting Credit: Uruguay improved its credit information system by introducing a new online platform allowing access to credit reports for financial institutions, public utilities and borrowers.

DB2011

✓ Registering Property: In Uruguay the Municipality of Montevideo made registering property easier by eliminating the need to obtain a mandatory waiver for preemption rights.
Registering Property: Uruguay made transferring property more difficult through a new law giving preemption rights to the Municipality of Montevideo and thus adding a procedure—though at the same time it made transferring property easier through new online procedures.

Resolving Insolvency: Uruguay improved its insolvency process through a new insolvency law aimed at keeping a larger number of financially distressed companies operating as a going concern.

Starting a Business: Uruguay made starting a business easier by eliminating the minimum capital requirement.

Paying Taxes: Uruguay made paying taxes easier for companies through a new tax law abolishing COFIS (a 3% sales tax) and reducing the value added tax rate.

Trading across Borders: Uruguay reduced the time for exporting and importing by implementing an electronic data interchange system and through improvements in the banking sector.

Paying Taxes: Uruguay made paying taxes easier and less costly for companies by eliminating certain taxes, combining social contributions and reducing the profit, personal income and value added tax rates.
Doing Business 2019 is the 16th in a series of annual reports investigating the regulations that enhance business activity and those that constrain it. The report provides quantitative indicators covering 11 areas of the business environment in 190 economies. The goal of the Doing Business series is to provide objective data for use by governments in designing sound business regulatory policies and to encourage research on the important dimensions of the regulatory environment for firms.
